

Industrial Waste Professionals™

Introducing
The AWS Manifest Retention Advantage™
A New Service From Your Friends at AWS

**Pulling Your Hair
Out Over Manifest
Matching and Filing?**

**Federal and State Laws Require You
to Use and Retain Waste Manifests!**

As you already know, manifests and other documents serve a valuable and important purpose for your company. Federal and State regulations require the use of manifests for hazardous and many non-hazardous waste shipments. These regulations also require that manifests be retained and made available upon request by authorized government officials.

Do You Have The Time?

If your company is like most, the burden for making sure that all the proper waste manifest copies are collected, reviewed and filed probably falls on someone with many other pressing responsibilities. More than likely, responsibilities that were once handled by two or even three employees are now handled by one person. If so, chances are some things like comprehensive and orderly manifest retention fall through the cracks.

The Government Wants Answers . . . Not Excuses!

It's ironic. When the government can't perform, they offer "funding cuts" and "hiring freezes" as excuses. **But don't try to use excuses with them.** When a federal or state official wants to see your manifests, you'd better be able to produce them. **NOW!** If you can't produce your manifests in a comprehensive and orderly fashion, you risk the possibility of problems such as. . .

Significant Fines - Civil Lawsuits - Administrative Orders - Consent Decrees

...and you might just risk your own reputation! All for no reason!

With the **AWS Manifest Retention Advantage™**, **Your Problems Are Solved!**

AWS Will Provide The Answers You Need - Guaranteed!

At AWS, we not only share a passion for providing **Safe Solutions and Guaranteed Results**, we also share a passion for keeping phenomenal records. We've learned from experience (and from handling more than 10,000 manifests a year) how to develop and maintain the systems necessary to make sure your important manifest documents are in order and available at a moment's notice – Like when the **EPA or DNR Inspector** shows up.

**Here's Our Promise
AWS Will:**

- 1) Electronically catalog and securely store your waste manifests -- **Guaranteed!**
- 2) Provide you with peace of mind, knowing that your important documents are in our care -- **Guaranteed!**
- 3) Simplify your life and let you focus on your company and your customers -- **Guaranteed!**
- 4) Email you any manifest in our care within 1 hour of your request -- **Guaranteed!**

**Just
Imagine
the Peace
of Mind!**

The Choice is Easy, Secure, Affordable & Guaranteed!

No one likes to be unprepared, and the worst time to find out you're not as prepared as you should be is when you need a manifest – right now.
