

We specialize in eliminating risks and wastes of all kinds for the sustainability of our planet and your business.

**Waste Stream Reduction**

We focus on aligning your goals of waste stream reduction with the reality of where you are today. Whether your goals are Zero Landfill, 20% reduction in disposal cost or less headaches related to managing waste, we'll help you with your waste minimization plan.

**Crisis Preparedness**

When it comes to the sustainability of your business, does it include a spill response plan? We are the single point of contact, incident command center, regulatory guidance and clean up response team if a spill occurs.

**Safety & Training**

Let us be your partner in accident prevention and required OSHA and EPA training. We will provide the training that is so important to both your employees and your peace of mind.

**Industrial Cleaning**

For nearly any high risk or difficult cleaning project, we will deliver on your goal and the promised result. Whether the project is a confined space entry, obsolete chemical disposal or a building decommission we can help eliminate your wastes and risks.

**Service Advantage:**

- Waste Transportation
- Waste Processing
- GRIP – LAB PACKS
- Cleaning Services
- Lab Analysis

**Treatment facilities located in:**

- Portage, IN
- Milwaukee, WI
- New Castle, PA
- Cedar Rapids, IA
- Rockford, IL

At Advanced Waste Services we've adopted the earthFirst initiative where we recognize the importance of preserving the environmental security of our natural resources.

As Environmental Stewards, we annually convert more than 300 million pounds of contaminated wastewater into new and valuable natural resources.
