

The Industrial Waste Professionals™

Introduces The Confined Space Educator™

When a Customer thinks about professional Confined Space Entry, we want them to immediately think Advanced Waste Services, Inc. Why? Because our dedication to the subject material is believed to convincingly surpass that of all competitors in the industry.

AWS Launches Confined Space Entry Safety Training Program

To prove it, in May 2006, AWS proudly unveiled its latest and greatest development in simulation based training.

Using a roll-off container as the platform for this innovative training system, a highly experienced team of employees has created a modular unit that is sure to challenge even the most experienced confined space minds. This transportable unit can accommodate up to 10 people, allowing for each student to be fully engaged in a series of condition-based entries.

Real World Situations

The Confined Space Educator™ course addresses all the aspects of Permit Preparation, Lockout Tagout, Equipment Responsibility, and Rescue Activities specific to any customized environment. The course is

The Confined Space Educator™ Benefits
