2011 DSW Proposed Rule

On June 30, 2011, the EPA Administrator signed a rule proposing new safeguards for recycling hazardous materials to protect public health and the environment.

The proposal modifies EPA's 2008 Definition of Solid Waste (DSW) rule that revised hazardous waste regulations to encourage recycling of hazardous materials.

The proposal will improve accountability and oversight of hazardous materials recycling, while allowing for important flexibilities that will promote its economic and environmental benefits.
